

Starter kit

all you need to start working with Leja® slides

Leja offers a complete package for laboratories wanting to start with the Leja disposable counting chambers. The package contains everything that is needed to start counting sperm samples within 10 minutes. All that needs to be done is retrofitting the eye-pieces of the microscope with the gridded ones as supplied in the starter kit and calibrating the microscope just once.

Contents:

The starter kit contains the following items:

- 6 boxes of Leja slides of your choice (please see below for catalogue-ID)
- 2 replacement eyepieces (ø23mm or ø30mm) of which one is fitted with a grid of choice
- A stage micrometer for calibration purposes
- A stopwatch
- All necessary manuals
- Background literature

Catalogue-ID:

Kits can be ordered with slides, eyepiece diameter, and grid type of your choice (subject to availability):
Catalogue ID is a build up-code: SK-AA-BB-CCCC

AA = slidetype		BB = diameter		CCCC = grid type	
11	SC-10-01-04-B	23	23mm	1010	10x10 sq – 10mm
14	SC-20-01-02-B	30	30mm	0510	5x5 sq – 10mm
15	SC-20-01-04-B			1007	10x10sq – 7.07mm
16	SC-20-01-08-B			0505	5x5 sq – 5mm
17	SC-100-01-02-A				

Example: SK-14-23-0505 → Leja starter kit with SC-20-01-02-B (20 micron – 2 chamber) slides, eyepieces of 23mm outer diameter fitted with a grid of 5 x 5 squares with a total box width of 5mm.
